Partner for the Model Railroading Industry

- **Lenz GmbH** is the world's leader in producing Digital Command Control products for model railroads.
- Our products are carried by fine hobby stores world wide.
- Our DIGITAL plus line of DCC equipment is compatible with the National Model Railroad Association's DCC Standards and RP's
- Our goal is to supply simple-to-use, compatible systems, low in cost and to continue to develop new products for the future.
- Since 1980, we have been developing and supplying products to the model railroad industry, in 1995 alone we produced over 100,000 DCC decoders.
- We have formed partnerships with other manufactures to expand DCC technology into other scales, and products. you will see our name on other DCC products from LGB, ROCO, Con-COR, Atlas, etc.

Conformance Statement

As official company policy, Lenz GmbH's goal is to have all Lenz GmbH products display the **NMRA** conformance warrant. This will take time but as each product is upgraded, we will redesign it to fully conform to the NMRA requirements. **We feel strongly that this is an important program for both the manufacturers and the consumer.**

"We are proud to have the first advanced decoder to achieve the prestigious NMRA Conformance Warrant. Our new decoders are more reliable, and work much better with competing brands than could ever have occurred via our testing alone. Our new command station software will now work with all compliant decoders no matter who produces them."

Warranty Policy

Lenz GmbH does everything it can do to ensure that our products are free from defects and will operate for the life of your model railroad equipment. To protect your investment in DIGITAL plus products, Lenz GmbH offers a progressive 10 year Limited Warranty. Full details are included with each product. Our "goof proof" replacement policy is a real statement about our quality level and trust of model railroaders.
